According to TVC taxonomy of Nettrice R. Gaskins

Art roulette is a concept of a tool, that can be helpful in art classes or during different artistic approaches. It proposes a series of randomly chosen actions to apply on the visual artwork, object or text. The tool provokes to expand our usual art practices. It can serve as a tool to work in a group and to create a common artwork in a playful way.

The idea is inspired by diagram TVC taxonomy published in the writing of Nettrice R. Gaskins titled „Techno- Vernacular Creativity and Innovation across the African Diaspora and Global South". The author analyses the vernacular strategies to approach technology. These strategies subvert existing politics of technology that favorise material and intellectual resources.
The author claims „technologies are not mere tools that we use, but active forces in the world".
